## Overview

Alaska experienced population growth of 23,160 up 3.26% from the previous decade. As the population shifted, interior Alaska experienced population loss. The growth in the state came from central Alaska near Homer and north of Anchorage, as well as districts on the north and western coast. Cities like Juneau and Fairbanks also experienced growth. Alaska will continue to have one congressional district after this redistricting cycle.

The White population decreased by 33,562, a 7.37% decrease from 2010. Their representation fell from 64.11% of the state's population to 57.51%. This loss came from across the state with 33 of 40 districts reporting White population loss. Growth came from districts 38, 39, and 40 which make up the southwest and far north regions of the state. It also came from the south central region just outside Anchorage in districts 9,10, 11, and 12.

The Hispanic population grew 10,575, an increase of 26.94%. Every district with the exemption of 20 experienced growth in the latino population. Latinos now make up 6.79% of the population up from 5.53% the previous decade.

The American Indian and Alaskan Native population increased by 6.13% or 6,282 people. They make up 14.84% of the population, up slightly from the previous decade's 14.44%.

The Asian population continues to grow up 15.99% from the previous decade now making up 5.92% of the state's population. This increase came from across the state with 35 of 40 districts showing population growth. Areas like Anchorage and its surrounding region experienced much of this growth.

The African American population decreased by 1,218, a change of 5.55% from the previous decade. The overall share of the population fell from 3.09% to just 2.83% in 2020.

## Congressional

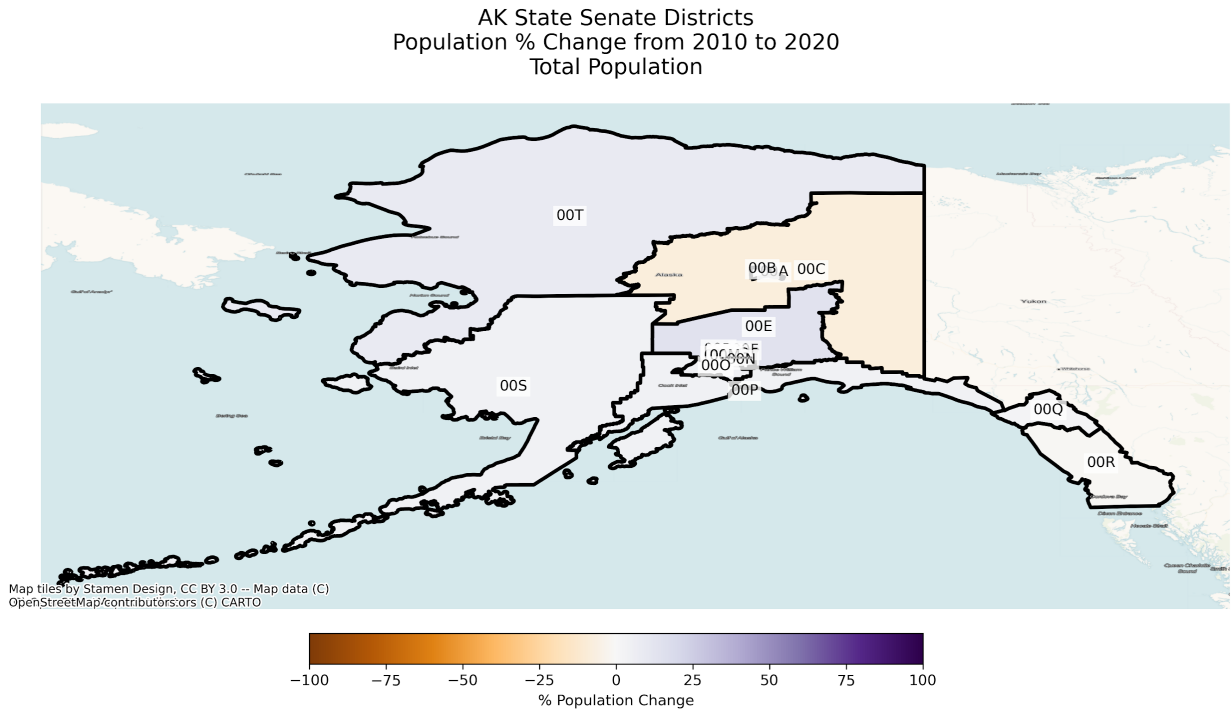

Alaska currently has one at-large congressional district.

## State Senate

The charts below display the percent change in population from 2010 to 2020 for the listed group. Please note that the color bars are fixed to be from -100% to 100% and these maps are

displayed in brown to purple. If the percent change in population was outside of this range, the color scheme changes to red to green to indicate a change.
